IB

Jeff,

With regard to authorship, I would include Carole McBride PhD as she was very involved in the legacy study which originated the data.

And Tom and Maria may want to include Matt? But I will let them make that call.

As for sequence I assume you are writing and will be first author. I would vote for having Maria last and senior, as it will be most helpful for her. I am fine with any sequencing in between.

Approval numbers if needed;

UVM Committee for Human Research in the Medical Sciences (CHRMS) approvals

Pregnancy Phenotype and Predisposition to Preeclampsia [CHRMS M10-226](#)

The Interaction of Basal Risk, Pharmacological Ovulation Induction, Pregnancy and Delivery on Hemostatic Balance [CHRMS 18-0091](#)

Funding

The Interaction of Basal Risk, Pharmacological Ovulation Induction, Pregnancy and Delivery on Hemostatic Balance NIH NHLBI R-33 HL 141787 (PI's Bernstein , Orfeo)

Pregnancy Phenotype and Predisposition to Preeclampsia NIH NHLBI R01 HL 71944 (PI Bernstein)

Let me know if you need anything else.

Ira

Subject: Stuff for BST paper

Hi All —

I'm putting together a draft of the Biochemical Systems Theory (BST) paper, and I need a few things from you:

1. Author list: right now, I have Maria, Tom, Ira, and myself. But I'm leaving folks out. Please send me names, affiliations, and order for people we should include
2. IRB/study language: I've noticed some IRB language from a couple of Maria's papers at the start of the materials and methods. Can you please send me that language for the legacy data?
3. Materials and Methods for thrombin generation assays.
4. Funding Statement: Is there particular language required by the grant, and how should we cite the grant.

Thanks!

cheers — jeff
